Total Recall VR has over a decade’s worth of experience in designing, manufacturing, installing and supporting voice logging systems. Sold and serviced in more than 65 countries via a worldwide reseller network, Total Recall has provided professional, cost effective call recording solutions for governments and enterprises large and small.

Our voice loggers are not limited to ISDN networks. We can record VoIP, Analog and Radio communications as well as PRI ISDN, leveraging our custom built hardware to combine all your recording needs into one system.

Manufactured By Prolancer Pty Ltd

2/34a Olive Street, Kingsgrove 2208, Sydney, NSW, AUSTRALIA
Ph: (+61) 8065 0966 Web: www.totalrecallvr.com

System Specifications

Interfaces: ISDN PRI (ITU-T G.911, National ISDN 1 & 2, Nortel DMS 100, AT&T 4ESS, Lucent 5ESS, Euro ISDN).
Recording trigger via ISDN D-Channel.
Codes: PCM (ITU-T G.711a & G.711mu law), SPEEX (3:1), WAV (16 bit, R8k) & MP3 export.
Onboard Operating System: Linux (CentOS 5.7).

Hardware Specifications

Processor: Intel Core 2 Duo.
Display and Controls:
MAX Rack
130mm x 97mm TFT LCD, with customised keypad. Tilting control panel allows for installation at any height in a communications rack.
LinX Evolution
GUI version with external 10.1" LCD and custom external keypad, or Server version with all configuration, monitoring, search and management functions via your TCP/IP networked Windows PC.
On-board Storage: Enterprise SATA hard drive storage, RAID-1 hot-swappable on MAX Rack. Store your most recent 130,000 hours of calls on-board. Optional SSD storage.
Archive Options: USB Port, CD/DVD/Blu-Ray archive drive.
TCP/IP Network Archiving to Windows or UNIX systems via NFS v2/v3 or CIFS/SMB.
Power:
MAX Rack
320+320W Hot-Swap Power Supplies
LinX Evolution
Single 100-240W Power Supply
Network Interface: 2 x 8P8C Rj45 Network Ports
SMDR Interface (Optional): TCP/IP

The total solution to your voice logging needs

**DEVELOPING INNOVATIVE VOICE LOGGING SOLUTIONS FOR GOVERNMENTS AND ENTERPRISES WORLDWIDE**

In an increasingly security conscious, litigious and results driven world, telephone recording is vital to meeting your duty of care, management and legal requirements. Enterprises and governments worldwide are seeking professional, fully featured ISDN recording solutions that are both efficient to use and cost effective.

Total Recall VR has the total solution to your problem. Our Linux-based ISDN recording servers offer the highest degree of reliability, flexibility and performance – providing all of the recording, archiving, search, monitoring and management tools that you need in an easy to use, turnkey package. Total Recall VR has an ISDN recording solution for a wide variety of applications. Our MAX Rack system offers the highest degree of hardware redundancy, hybrid recording capabilities and system management possibilities, while MAX Desktop provides a stylish, compact and highly cost effective alternative.

Take advantage of the built-in control panel on Total Recall VR MAX Rack, or alternatively you can manage, search, monitor and archive your calls via Remote Manager PC software – included at no extra charge with all Total Recall VR systems.

**flexible ISDN recording solutions**

**Total Recall VR – MAX Rack**

When the reliability of your call recording system is critical, Total Recall VR MAX Rack provides the highest degree of hardware redundancy and data backup possibilities. With a built-in screen and keypad, Total Recall VR MAX Rack is fully self-contained, and supports up to 60 simultaneous ISDN calls per unit. Combine multiple units in a ‘server bank’ for virtually unlimited system channel capacity.

- **Mirrored Hot-Swap Hard Drive data storage** (accessed via the tilting front control panel)
- **Dual Hot-Swap Power Supplies Included**
- **Backup calls to a network drive or dedicated NAS server (sold separately), USB device, CD/DVD, or to an optional Blu-Ray drive.**
- **Supports up to 60 simultaneous ISDN calls, and can support hybrid ISDN/VoIP/Analog/Radio recording within one enclosure.**

**Total Recall VR – LinX Evolution**

Offering the lowest cost per PRI ISDN recording channel, Total Recall VR LinX Evolution is the compact and cost effective solution for ISDN call recording applications.

With all monitoring, search and management functions controlled via Remote Manager Windows PC software (included license free at no extra cost with your system), Total Recall VR LinX Evolution leverages your existing IT infrastructure to provide a scalable, easy to use and cost effective ISDN recording solution.

- **Mirrored Hard Drive storage for improved hardware redundancy**
- **Supports up to 60 simultaneous ISDN calls, and can support hybrid ISDN/VoIP recording within one enclosure.**
- **Backup calls to a network drive or dedicated NAS server (sold separately), USB device or CD/DVD/Blu-ray media.**
- **Ultra-quiet, cool running enclosure, well suited to front office or server room environments.**

**THE TOTAL RECALL DIFFERENCE:**

- **Purpose Built for Maximum Uptime**
- **Intuitive Layout for Minimal Training Requirements and Time-Efficient Call Search and Monitoring**
- **Supports PRI ISDN, SIP, H.323, SDP and RTP VOP Interfaces**
- **Hybrid Recording Interfaces for Maximum Cost Efficiency**
- **Fully Scalable – Manage One or Multiple Units with Included Remote Manager Software**
- **Multiple Backup and Hardware Redundancy Features Built-In**
- **Remote Windows PC Access Software Included License Free at No Extra Charge**
- **Specifically Designed Linux-Based System Software for Complete Reliability, Speed and Security**
