

Total Recall Software V4.60

(For use only in *Total Recall* # TRL & TRR. Do not use in PC.)

RELEASE NOTES & UPGRADE PROCEDURE

Release Date: October 01, 2007

We are pleased to announce the Release of *Total Recall* Software V4.60. Software Version V4.59 was the last release. *Remote Manager* Software has also been updated to V1.60. *Remote Manager* Software Version V1.59 was the last release. The User Manual has also been updated to V4.60.

You MUST upgrade BOTH the recorder and Remote Manager (PC client software) at the same time. Only *Remote Manager* Software V1.60 will work with *Total Recall* recorders running software V4.60.

Important Note: This software will only operate on **Total Recall LAN capable units.** Do not install on OS2 units. LAN capable units have color displays like a notebook PC (TRL and TRR series).

Feature Introduced with Total Recall Software V4.60

- Support for *Network Time Synchronization* (NTP).

Features Introduced with Total Recall Software V4.56 and V4.59

- Support for *Record on Demand* (ROD) Software that can be used to permit non-administrative users to only have access to a single recording channel via LAN/WAN connection.
- Administrators can now limit which channels users of *Remote Manager* Software via LAN/WAN or dial-up can access.
- Improved installation of *Total Recall* with *Remote Manager* Software running behind a Firewall.
- Introduction of French (V4.59), Portuguese, Korean, Japanese, and Arabic language options.
- The ability to add more than 10 *Total Recall* recorders to the *Remote Manager* monitoring screen.
- Update to Linux software that will automatically adjust for new Daylight Savings Time changes when the *Total Recall* recorder is set to a Time Zone for a city in the USA (updated with V4.59).

Instructions for Loading New Software (V4.60) to Total Recall
